

Dr. Bhavya Lal, Associate Administrator for Tech, Policy and Strategy (Fmr.), NASA: Exploring Space, Addressing Orbital Debris & Enjoying Golgappa!

Podcast | Madam Policy

September 28, 2023 | 1 minute read

“Learn to be a storyteller” is just one of the pieces of advice that the brilliant Dr. Bhavya Lal would give to her 24-year-old self. Dr. Lal and her analyses have been at the forefront of space policy for the past decade; she created and curated the role Associate Administrator for Tech, Policy, and Strategy at the National Aeronautics and Space Administration (NASA); and she was the first woman in 60 years to hold the position of acting chief technologist for NASA. She spent years in the private sector leading strategy technology assessment for The Institute for Defense Analyses. She has four degrees—three of which are from MIT—and she was nominated and selected to become a member of the International Academy of Astronautics.

Join hosts [Dee Martin](#) and chair of Bracewell's technology section [Constance Rhebergen](#) as they speak with Dr. Lal about her amazing work with space initiatives, policy, and technology. They discuss the potential between international collaboration on Space IP, the Artemis program, and the efforts to explore space beyond our moon. Ever wonder about the increasing commercialization of space? Thinking about orbital debris? Curious about whether the plot of Gravity is more feasible than we thought? Then this episode is for you! Or, if you just really love golgappa, like our guest and hosts do, then this episode is really for you! Tune in now!
