

Commercial and Legal Considerations for Contractual Arrangements for CO2 Pipelines

Event

December 18, 2024 | 1 minute read

George Fatula will lead a presentation at the CO2 Pipeline Summit 2025, discussing the commercial terms typically found in contracts for CO2 pipeline transportation, including those supporting sequestration and other projects. He will also address regulatory issues arising under common carrier requirements and examine how future federal statutory and regulatory changes could impact contractual commitments to CO2 pipelines.

Address

George R. Brown Convention Center
