

Electrifying the Oilfield: Infrastructure Development and Behind-the-Meter Power Sales

Event

December 18, 2024 | 1 minute read

Jared Berg and Bryan Clark will present on a panel titled “Electrifying the Oilfield: Infrastructure Development and Behind-the-Meter Power Sales” at the 2025 TJOGEL Symposium. The presentation will discuss current trends in the electrification of oilfield production and associated infrastructure, focusing on how operators are addressing increasing power demands through renewable energy projects, often integrated directly with their facilities. Specifically, it will examine the structuring of behind-the-meter power transactions, opportunities for collaboration with renewable energy developers, and the challenges involved in executing these transactions.
